

AI Engineering Intern

Engineering • 0-1 • FullTime • Mumbai • Fynd526

Fynd is India's largest omnichannel platform and a multi-platform tech company specializing in retail technology and products in AI, ML, big data, image editing, and the learning space. It provides a unified platform for businesses to seamlessly manage online and offline sales, store operations, inventory, and customer engagement. Serving over 2,300 brands, Fynd is at the forefront of retail technology, transforming customer experiences and business processes across various industries.

We are looking for ambitious, curious, and self-driven individuals to join our AI Engineering team. In this role, you will work across a broad spectrum of AI-driven engineering tasks — from building internal tools and prototypes to integrating AI features into real-world products. You will operate in a fast-paced environment where rapid experimentation, creative problem-solving, and independent learning are highly valued. This internship offers the opportunity to work on impactful projects while exploring and implementing the newest advancements in AI.

What You Will Do at Fynd

- Design, build, and scale **Generative AI systems**, including **LLM-powered agents and prompt-driven workflows**.
- Develop and integrate **AI-first features** across Fynd products, embedding intelligence directly into real-world user and business flows.
- Architect and implement **production-grade AI services** using **Python and FastAPI**, with a strong focus on clean APIs, modular design, and scalability.
- Rapidly prototype, benchmark, and deploy **AI-driven applications and internal tools** in a fast-paced, high-ownership environment.
- Translate ambiguous, high-level problem statements into **working AI solutions** through independent research, experimentation, and iteration.
- Collaborate closely with product and engineering teams to ensure AI solutions are **reliable, deployable, and aligned with product needs**.
- Stay deeply up-to-date with **emerging LLMs, agent frameworks, tooling, and best practices**, and apply them pragmatically to solve real problems.

Specific Requirements

- **Prior internship experience** in software engineering, machine learning, or applied AI, with hands-on work in:
 - **Large Language Models (LLMs) and prompt engineering**
 - **AI agents and orchestration frameworks**
- **Strong foundation in Python**, with real-world experience building backend services using **FastAPI** or

similar frameworks.

- Solid understanding of **machine learning fundamentals**, including training workflows, evaluation metrics, and data handling.
- Experience designing **API-driven architectures**, integrating external services, and embedding AI into existing systems.
- Strong **problem-solving aptitude**, with the ability to operate effectively in fast-paced and ambiguous environments.
- Comfortable working independently, owning features end-to-end with minimal supervision.
- Actively engaged with the AI ecosystem and current industry trends.
- Passion for **rapid experimentation, prototyping, and learning new technologies**.

What do we offer?

Growth

At Fynd, growth is limitless. We nurture a culture that encourages innovation, embraces challenges, and supports continuous learning. As we expand into new product lines and global markets, we're seeking talented individuals eager to grow with us.

We believe in empowering our people to take ownership, lead with confidence, and shape their careers.

- **Flex University:** Access in-house learning sessions and workshops designed to enhance your professional and personal growth.
- **Learning Wallet:** Enrol in external courses or certifications to upskill—we'll reimburse the costs to support your development.

Culture

We believe in building strong teams and lasting connections.

- Regular community engagement and team-building activities
- Biannual events to celebrate achievements, foster collaboration, and strengthen our workplace culture.

Wellness

Your well-being is our priority. Comprehensive Medclaim policy for you, your spouse, children, and parents.

Work Environment

We thrive on collaboration and creativity. Our teams work from the office five days a week to encourage open communication, teamwork, and innovation.

Join us to be part of a dynamic environment where your ideas make an impact!
